

PREDATOR

PMF150

Case size: N150

Technical Information

The Predator PMF150 is a heavy duty commercial battery designed to suit applications which require an N150 case. The stamped positive grids deliver high starting power and superior corrosion resistance.

The PMF150 is engineered & manufactured to the highest quality standards by one of the top battery manufacturers in Korea.

Features & Benefits

- Full Frame positive grids
- Excellent corrosion resistance
- High cranking power
- High capacity
- Excellent vibration resistance

Product details

- | | |
|---|---------------------------------|
| ○ MF150 Maintenance Free Battery | ○ Cold Cranking Amps [A] - 1000 |
| ○ Not suitable for ISS (Idle Stop Start) applications | ○ Length [mm] - 508 |
| ○ Assembly - RH Positive [- +] | ○ Width [mm] - 222 |
| ○ Voltage [V] - 12 | ○ Height [mm] - 241 |
| ○ Battery Type - Maintenance free | ○ Terminal Type - SAE |
