

## PREDATOR

Date generated: 16/09/2026

### MX12-4

**Case size:** PREDATOR YTX12-BS

The Predator X-series has been engineered for superior starting power, high reserve capacity and an extended life to give you more freedom out on the open road or the open sea.

The AGM design allows easy, stress free installation with no risk of acid spills, making it the smarter choice for powering your prized equipment.

#### Features

- AGM technology with high compression separator
- 100% leak proof and spill proof
- Grid and cast on strap design has been optimised for maximum current flow
- Excellent starting power, even at a low State of Charge
- Ideal for jet skis and high capacity V-Twin motorcycles
- High charge acceptance

#### Product details

- |                                |                              |
|--------------------------------|------------------------------|
| ○ X Series AGM Battery         | ○ Battery Capacity [Ah] - 10 |
| ○ Assembly - LH Positive [+ -] | ○ Length [mm] - 150          |
| ○ Voltage [V] - 12             | ○ Width [mm] - 87            |
| ○ Battery Type - AGM Battery   | ○ Height [mm] - 130          |
| ○ Cold Cranking Amps [A] - 180 | ○ Weight [kg] - 4.1          |
